DETAILED ACTION

1. This is an Allowance of all claims pending from the Applicant's amendment filed 3/23/2009. Claims 1-44 are allowed.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 8/26/2009 has been entered.

Information Disclosure Statement

3. The information disclosure statement (IDS) submitted on 8/26/2009 with the filing of the RCE has been considered by the examiner. The claims remain allowable over the prior art of record.

Terminal Disclaimer

4. The terminal disclaimer filed on 7/8/2009 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of Appl. No. 10/802,524 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

Applicant's arguments filed 3/23/2009 (Remarks, page 18) are persuasive with respect to rejection of claims 1-44 under 35 U.S.C. 103(c) as being unpatentable over Weinstock et al. (US 6,223,143) in view of Lavu et al. (US Pat. Pub. 2005/0060213) and further in view of Booth et al. ("Meeting Future Drilling Planning and Decision Support Requirements: A New Drilling Simulator," Schlumberger: 2001). Specifically, none of Weinstock, Lavu, or Booth, alone or in combination, teach or fairly suggest *calculating a plurality of ranked individual risks extending along a depth of said wellbore in response to a ranking step and displaying said risk information, the displaying step including displaying said risk information on a risk information display, said risk information display including a simultaneous display of said plurality of ranked individual risks calculated along said depth of said wellbore* as now recited in independent claims 1, 19, 23, and 41.

The newly submitted prior art Union Oil (WO 91/13237 to Mueller, Mark D.) teaches a system and method for predicting wellbore drilling conditions and modifying wellbore designs based on drilling and Earth variables, mitigating risks to wellbore drilling by producing friction factor (risk) curves (e.g. Figures 4, 5) by depth and indicator weight, and using the friction factor curves and probabilities to shift indicator weights into feasible ranges (Figure 6) for modifying the analyzed wellbore design. Union Oil further *discusses* certain numeric values of friction factors, variously, as "severe", "normal", "safe", "acceptable", "unacceptable", and uses "feasible ranges" and

"unwanted condition" thresholds (see Summary of the Invention and esp. pages 12-14) in using friction factors to determine acceptable wellbore designs. However, Union Oil does not expressly teach *calculating a plurality of ranked individual risks using logical expressions to rank risks as high, medium, and low risks, and displaying the calculated risk information on a simultaneous display of the plurality of the ranked individual risks along side the depth of the wellbore* as recited in independent claims 1, 19, 23, and 41.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dave Robertson whose telephone number is (571)272-8220. The examiner can normally be reached on 8 am to 6 pm, M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Albert Decady can be reached on (571) 272-3819. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
